Reasons for Allowance

The following is an Examiner's Statement of Reasons for the indication of allowable 3. subject matter.

Claims 1-15 are allowed over the prior art of record. The present invention discloses a 3.1 bending life predicting method of predicting bending life spans of a plurality of wires induced by vibration, with at least two points of each of the plurality of wires being constrained.

While these elements are individually disclosed in the prior art, the prior art of record does not meet the conditions as suggested in MPEP section 2132, namely:

"The identical invention must be shown in as complete detail as is contained in the ... claim. Richardson v. Suzuki Motor Co., 868 F.2d 1226, 1236, 9 USPQ2d 1913, 1920 (Fed. Cir. 1989). The elements must be arranged as required by the claim, but this is not an ipsissimis verbis test, i.e., identity of terminology is not required. In re Bond, 910 F.2d 831, 15 USPQ2d 1566 (Fed: Cir. 1990)."

The improvement of the present invention comprises, in various embodiments, the elements of the invention as discussed in the reasons for allowance detailed in the non-final paper dated 25-June-2007. This patentable distinction is included in each of the independent claims, nos. 1, 7, 13 and 15.

Dependent claims 2-6, 8-12 and 14 are deemed allowable as depending either directly or indirectly from independent claims 1, 7, and 13.

The instant application is directed to a non-obvious improvement over the inventions 3.2 described in USP 6,839,642, issued to Kawakita et al., which teaches a wire harness flexure life Serial Number: 10/534,069 Page 3

estimating method, and USP 6,439,059, issued to Inoue et al., which teaches a method for

predicting the bending life of wires in a wiring harness.

3.3 The art of record, either individually or in combination, fails to teach, suggest, or render

obvious the specific arrangement of elements in the same combination as now required by the

amended claims. In view of the foregoing, the claims of the present application are found to be

patentable over the prior art.
